Instructions for downloading <u>MAMP</u>

1. Download and install the MAMP application by following the installation prompts.

2. Open MAMP (don't open MAMP Pro - both will be installed to the computer)

3. Before starting the servers, go to the menu MAMP > Preferences. Under the ports tab, click the button 'Set Web & MySQL ports to 80 & 3306' and click 'OK'

0 0 0		Ν	AMP		
General	Ports	PHP	Web Server	MySQL	Cloud
	Apac Ng MyS	the Port: 80 inx Port: 80 QL Port: 33	(1 - 65535) 06 (1024 - 655	35)	
		Set MAMP	ports to default		
	Set	Web & MySG	QL ports to 80 & 33	806	
Show all	l dialogs again		Cance	el	OK I 🕹

4. Start the servers and minimize MAMP

	0	MAMP		
		1P	Apache Server MySQL Server	0
	/		Cloud	•
1				
			<u> </u>	
[Cloud	Open WebStart page	Start Servers	
				1 4

If the servers start properly, the LEDs for 'Apache Server' and 'MySQL Server' will highlight green.

5. Install/Open MySQL Workbench and Setup a new connection and call it Local instance 3306 (note: you only have to do this once)

6. Here are the correct settings:

.					
Connection Name:	Local instance 3306				Type a name for the connection
Connection Method:	Standard (TCP/IP)				Method to use to connect to the RDBMS
		Parameters	SSL	Advanced	
Hostname:	127.0.0.1	Port:	3306		Name or IP address of the server host - and TCP/ IP port.
Username:	root				Name of the user to connect with.
Password:	Store in Keychain	Clea	ır		The user's password. Will be requested later if it's not set.
Default Schema:					The schema to use as default schema. Leave blank to select it later.

Click OK.

7. Click on the Local instance 3306 connection to connect to MySQL. The username is root and the password is "root".

	Please enter following ser	password for the vice:		
	Service:	: Mysql@localhost:3306		
62	User:	root		
Workbench	Password:			
		Save password in keychain		
		Cancel OK		

Once connected, you will be able to import data and perform queries on the database. When you are done working in MySQL Workbench, be sure to close the connection before exiting the program.

For future work sessions, open MAMP and start the servers. Then open MySQL Workbench and launch the 3306 instance.

You can download MySQL Workbench here.
