

## Test for August 6

1. Name five public records?
2. What is an open data-portal?
3. Why is the connection made between open data and open government?
4. The open-data policy is called a movement: true or false?
5. We can use the open-data process to obtain [Question Period Notes](#). What are those notes? And what is their journalistic value?
6. Nova Scotia's [political donation datasets](#) do not contain postal codes. The [federal data](#) does. Why is it important to have postal codes?
7. In general terms, describe the process of mapping?
8. By logging on to the Canada Revenue Agency's charity listings, what kind of information can we learn about charities?
9. Download the [charities database](#) we'll be using for the remaining questions. Open the table. Create a new column, call it "Year", and in the cell immediately below the title, type the function that pulls the year from the date, and copy the formula to the bottom of the column.
10. Create a pivot table that **groups** "registered" charities by year, and then **subdivides** those groups by the years 2015-2020.
11. Create a second pivot table that groups "revoked" charities by year, and then subdivides those groups by the years 2015-2020.
12. Create a third pivot table that groups the "registered" charities from Atlantic Canada, and then subdivides those groups by the years 2015-2020.
